

EdgeLine – Staircase Portfolio

Staircases : whether used as a feature or for function, each one is bespoke and tailored to your exact requirements

Audi Dealership : Showroom Stair

270 degree helical staircase with rest platform at mid-span. Constructed with mild steel flat stringers and folded tray treads. Supplied finished in primer with final decoration applied on site. Balustrades constructed with twin flat mild steel posts utilising a “no-weld” assembly system : finished PPC metallic silver. Infill comprises 10mm thick clear toughened curved glass fixed between posts via stainless steel spider fixings. Stainless steel handrail mounted via matching fixing, all dressed to a satin finish.

Suffolk College : Main Atrium Stair

2 x Twin flight staircase spanning from ground floor to second floor, with semi-circular half landings mounted via single, common supporting column and concealed landing structure. Constructed with mild steel flat stringers and folded tray treads. Supplied finished in primer with final decoration applied on site. Balustrades to staircase and around atriums constructed with tubular posts and stalk mounted handrails (designed for 1.5kN loading) with 10mm toughened clear glass infill panels fixed via proprietary mounting shoes. All stainless steel dressed to a satin finish.

Private Residence : Feature Stair

2 x 180 degree helical staircase spanning from basement to first floor with no intermediate landings or supports. Constructed with mild steel flat stringers and folded tray treads as a structural element, all clad over (by others) for decoration. Balustrades constructed with secret fixed tubular posts and multi rail solid bar infill fixed via front mounted holder stubs. All stainless steel dressed to a satin finish. Handrail finished with a polished, circular timber profile, helix wound to suit stair profile.

Audi Dealership : Workshop Stair

Triple flight staircase with three landings : all self supporting. Constructed with PFC stringers and durbar treads. Balustrades constructed with tubular posts and handrails c/w multi rail infill. All items fabricated in mild steel and finished in primer. Final decoration applied on site.
